PERSONAL ISSUES ASSOCIATED WITH THE SIXTH CHAKRA

- Development of your intuition and inner wisdom
- Encouragement to devote time to your spiritual awakening
- The awakening of this chakra gives rise to emerging interests in the well being and welfare of the entire planet
- Because it exists beyond the vibration of karma, this chakra stimulates joy and playfulness
- Supports your contact with Grace and a deep openness to Grace manifesting in your life

ABOUT THE SIXTH DIMENSION

- The sixth dimension resonates beyond the frequency of karma. I call it post-karmic.
- The sixth dimension has a correlate contained within your body. In other words, there is an alternate embodied form of the sixth dimension located in the electrical fields of the body. My term for this sixth dimensional light interface within the body's energy field is "Spiritual Internet" or Grace. This light grid system conducts interconnected cellular consciousness via electricity in the body. In this system there is a direct interface among light, the cells, the electrical fields and your biochemistry. Grace is a biochemical experience.
- These light grids of Grace represent the beginnings of what we call the Light Body, an evolutionary aspect of the human energy field.
- This same Spiritual Internet simultaneously connects to the light grids within the planet. Therefore, we embody the "Planet Within," a vibrational patterning for the original dream of the planet. Aborigines descended this original dream into the land of Australia and held it into place through their very existence and the thriving of their culture. The original dream was that the earth be inhabited by diverse cultures living separate lives in separate regions, and yet all connected by the sixth dimensional light grid simultaneously anchored into the planet and each person's body.
- Awakening the sixth chakra brings a corresponding interest in serving the planet.
- The sixth dimension contains what have been called Light Beings or beings with light forms that embody a minimal density of matter, infused with a great deal of light.

- Other aspects of self in non-matter (light body and other non-physical realms) are included within the sixth dimension.

SHADOW ASPECTS OF THE SIXTH DIMENSION

I have never bumped into the darker side of the sixth dimension. There are, however, forces and beings whose aim is to distort the light of the dimensions and interfere with planetary grids of light both on earth and elsewhere.

TRAVELING IN THE SIXTH DIMENSION

- This is truly a beautiful dimension to experience, full of halls of light with crystalline purity and tone.
- Beings here regulate the light of the stars and their eminence throughout the galactic universe. They also serve as Light Workers for the planets.
- There are grand cities of Light with very high consciousness here. The sixth dimension is highly populated by light civilizations.

ASSOCIATED SENSATIONS WHEN TRAVELING IN THE SIXTH DIMENSION

- Joyous, light, exuberant, playful and ecstatic
- I have had the sensation of hallways within hallways within hallways of light unfolding endlessly within and through me.

APPLICATION OF SIXTH DIMENSIONAL ENERGIES

- Activating the Spiritual Internet of the cells or the Biochemistry of Grace deeply heals by reinstating light connections all throughout the body.
- Activation of the Light Body constitutes an evolutionary spiritual practice.
- To support the spiritual sustenance of the earth, you would energize the "Planet Within."
- Whenever you activate any of the Light grid patterns in the body, it fuels inspiration, joy and playfulness.
- Synergy codes (energetic patterns) from this level could be downloaded into the body to help create synergy within groups.
